

Sinclair's recent actions have shown the dangers to localised media caused by media consolidation.

Sinclair uses the public airwaves free of charge, and is obligated by law to serve the public interest. However, their recent actions have shown that they are more interested in pushing their CEO's political agenda. The moment individuals control large segments of the media and use that control to propogate their beliefs creates virtual censorship. Individuals are choosing what the public sees based on their own viewpoints instead of what the public deserves which is viewing free from political or religious slants.

Please let Sinclair know that the privelage of our airwaves is not to be abused. Thank you.
